RouteMatch to Deliver Turnkey ITS Technologies to City of Corona Transit Services

*-City of Corona selects RouteMatch Software to improve overall transit
performance and customer service-*

ATLANTA, February 23, 2006 – RouteMatch Software, Inc. today announced that it has been awarded a contract to provide the City of Corona with its intelligent transportation system (ITS) technology solution for the City's Transit Services.

RouteMatch will provide the City of Corona with its flagship paratransit software, RouteMatch TST™, including its computer-assisted passenger registration and dispatching system with integrated geographic information system (GIS) capability and vehicle mapping for ADA services. Through RouteMatch's partnership with Mentor Engineering, the scheduling system will also be integrated with a mobile data communication system for enhanced real-time communications between central operations and vehicles in the field. In addition, RouteMatch has partnered with Safety Vision to provide the City with on-board digital video surveillance and recording systems.

The City's vision is to leverage the best available technologies and assist Corona and its private contractor, Transportation Concepts, with providing premium levels of service in the most efficient ways possible. The City's main goals and objectives include the use of a turnkey system to provide accurate and reliable information and transportation to its customers.

Through the deployment of ITS technologies, the City will operate with improved on-time performance and the ability to move a greater number of passengers through enhanced information and fleet/operations management, without having to increase the vehicle fleet. In addition, RouteMatch's ITS solution will improve the overall system performance and the customer's perception of system responsiveness and reliability of service – resulting in increased ridership.

About the City's Transit System

The City of Corona operates a general public Dial-A-Ride, or DAR, and a fixed route system 'Corona Cruiser.' The City's paratransit and fixed route transit services are provided through Transportation Concepts. Transportation Concepts operates the City's transit system utilizing a fleet of 14 vehicles.

About RouteMatch Software

RouteMatch Software is a proven leader in transportation and logistics technology and services, with specific expertise in demand-response and paratransit systems. Targeting private and public sector transportation providers, the company's products address routing, scheduling, dispatching, billing, reporting, fixed route integration, and transportation coordination. Founded in 1999, the company is headquartered in Atlanta, GA, and its software is currently in use at more than 145 sites in 34 states across the U.S. Additional information about RouteMatch Software products is available at www.routematch.com or by calling RouteMatch Marketing Services toll-free at 888-840-8791 or 404-876-5160.
