RouteMatch Software Announces New Software Release for Enhanced Performance and Smarter, More Flexible Billing and Reporting

-- *RouteMatch 3.1 gives transportation providers added control and customization for increased billing and reporting efficiency, and sophisticated routing and scheduling --*
-- *RouteMatch 3.1 is the first transportation management software to implement true plug-in architecture --*

ATLANTA, October 16, 2006 – RouteMatch Software, Inc. today announced the availability of its RouteMatch 3.1 software release developed for private and public transportation providers needing advanced transportation management software that increases operational efficiency and helps deliver world-class customer service for riders.

“Our new software release is the direct result of lots of input from our customers. Providers are now using technology more than ever to run their routing, scheduling and dispatching in a coordinated, effective way and they are demanding more and more sophisticated solutions,” said David White, executive vice president at RouteMatch Software.

“RouteMatch 3.1 is the first transportation software to implement a true plug-in architecture; new program functionality can easily be “turned on” without affecting the entire system, and our smart billing and scheduling features adapt seamlessly to the user’s needs,” added White.

RouteMatch 3.1 comes with the following enhancements:

- **New Billing Engine Technology:** Providers can create their own unique billing formulas for maximum profit potential, and billing calculations and reconciling are done more efficiently.
- **True Plug-in Architecture:** Increases system performance; new features and files can be installed on the fly without disruption of business operations.
- **Sophisticated Reporting:** Additional reporting functions, and the ability to view several reports simultaneously.
- **New Scheduling Features:** New affinity algorithm allows providers to identify certain vehicles for specific types of transport, helping guide decisions on who rides which vehicle and under what conditions.
- **Audit Log:** Providers can track who makes changes to what customer information for a thorough audit trail.

- Suspension Feature: Allows provider to suspend trips for a period of time.

About RouteMatch Software

RouteMatch Software is a proven leader in transportation and logistics technology and services, with specific expertise in demand-response and paratransit systems. Targeting private and public sector transportation providers, the company's products address routing, scheduling, dispatching, billing, reporting, fixed route integration, and transportation coordination. Founded in 1999, the company is headquartered in Atlanta, GA, and its software is currently in use at more than 160 sites in 35 states across the U.S. Additional information about RouteMatch Software products is available at www.routematch.com or by calling RouteMatch Marketing Services toll-free at 1-888-840-8791 or 404-876-5160. Current Customers may contact RouteMatch at 1-866-653-3629.
