RouteMatch Announces Launch of Intelligent Transportation Systems Solution for Urban Transportation Providers

ATLANTA, June 13, 2006 – RouteMatch Software, Inc, today announced the launch of its RouteMatch ITS product suite, a set of intelligent transportation system solutions aimed at public transportation providers serving urban markets.

Intelligent Transportation Systems (ITS) are wireless and wire line communications-based information and electronic technologies that help transit systems maximize resources and save money through vehicle efficiency, improved service, and increased communication and coordination. As ITS deployments increase across the country, RouteMatch Software recognized the need to provide a single-source, best-of-breed solution for its customers.

“For far too long, ITS has been seen as a complex and overwhelming implementation. Our ITS solution simplifies the process by providing a fully integrated, ready to implement solution that is guided by first class project managers and backed up by our reliable support team,” said Brian Corcoran, director of ITS at RouteMatch Software.

RouteMatch leverages in-house technology development and corporate alliances to deliver one ITS solution encompassing four key areas:

- Fixed- route operations: streamline operations with computer aided dispatch and automated scheduling
- Paratransit operations: automate and coordinate paratransit scheduling, dispatching, reporting, and billing
- Intelligent vehicles: automate real time data collection with a host of on board devices
- Consumer information: leverage real time data collection with numerous customer focused technologies

About RouteMatch ITS

RouteMatch is a proven leader in transportation and logistics technology and services, with specific expertise in demand-response and paratransit systems. Founded in 1999, the company is headquartered in Atlanta, GA, and its software is currently in use at more than 150 sites in 35 states across the U.S. and has experienced one of the fastest growth rates within the industry in the past three years. Targeting private and public sector transportation providers, the company's products address routing, scheduling, dispatching, billing, reporting, fixed-route integration, and transportation coordination. Additional information about RouteMatch ITS products are available at www.routematchits.com or by calling RouteMatch toll-free at 888-840-8791.
