Maryland's Allegany County Selects RouteMatch Software's Transit Technology

- Recent contract between RouteMatch and Harford County allows other Maryland transportation providers such as Allegany to procure RouteMatch solutions based on Harford's software selection -

ATLANTA, August 9, 2005 – RouteMatch Software, Inc. today announced that it has been awarded a contract to provide its flagship transit software application, RouteMatch TS,™ to Allegany County Department of Public Works' Transportation Division. Allegany County is a rural public provider of demand-response transportation services in Cumberland, Maryland.

Per a recent agreement with Maryland-based Harford County Transportation, other city, county and state transit operators in Maryland – such as Allegany County - had the option to purchase or “piggyback” off of their contract with RouteMatch. Allegany is the first transportation provider in Maryland to take advantage of this option. Allegany has selected RouteMatch to assist in data automation, scheduling, dispatching, billing and reporting, while still allowing staff to keep full control over their operation.

“Allegany County Transit is excited about moving into the area of automated scheduling and feels that this is a major step for our county to provide swift and efficient service to better serve our customers,” stated Jim Stafford, Allegany's transit division chief. “After careful research by Harford and Allegany County, we feel that Route Match will help us accomplish our goals in automated demand-response scheduling.”

About Allegany County Department of Public Works' Transportation Division

Allegany County is a rural public transit agency that provides demand-response transportation in Cumberland, Maryland. Allegany County currently provides over 200 trips per day, utilizing 11 paratransit vehicles.
