Maryland-based Harford County Transportation Services Selects RouteMatch Software to Deliver State-of-the-Art Transit Technologies

- Contract will serve as a vehicle for other Maryland Transportation Providers to procure RouteMatch solutions based on Harford's software selection -

ATLANTA, July 29, 2005 – RouteMatch Software, Inc. today announced that it has been awarded a contract to provide its flagship transit software application, RouteMatch TS,™ to Harford County Transportation Services, a public provider of paratransit, demand-response and fixed route transportation services in Abingdon, Maryland. Per the agreement, other city, county and state transit operators in Maryland will have the option to purchase or “piggyback” off of Harford County’s contract with RouteMatch.

Harford chose RouteMatch to replace its outdated software system and to assist in data automation, scheduling, dispatching, billing and reporting while still allowing the dispatchers and users to keep full control over their operation. By implementing RouteMatch, Harford can achieve efficiencies and operational advancements to improve service delivery, reduce operating costs, and expand service and mobility options for its customers.

The contract is unique in that the request for proposal issued by Harford County contained a state and federal regulation clause that will allow other city, county, and state governments and/or transit operators within the state of Maryland to piggyback off of Harford County’s contract to procure similar technologies, such as RouteMatch Software.

“RouteMatch will offer a solution that will reduce Harford’s total cost of ownership for its transit ITS technologies,” said Chris Campbell, southeast regional sales director. “RouteMatch will also provide a level of implementation and integration services that will exceed expectations and be able handle all future growth.”

About Harford County Transportation Services

Harford County Transportation Services is a public transit agency that provides paratransit, demand-response and fixed route transportation within Harford County, Maryland. Harford County currently provides 400 trips per day, utilizing 21 paratransit vehicles.

About RouteMatch Software
