RouteMatch Software's Advanced Transportation Management Software Reaches Milestone Deployment

-- RouteMatch TS operational in more than 125 public transit systems across 34 states; adds nine new transportation customers --

ATLANTA, June 20, 2006 – RouteMatch Software, Inc. today announced that its advanced transportation management system, RouteMatch TS™, is operational in more than 125 public transit systems across 34 States and is currently being implemented in nine new public transit systems.

RouteMatch TS is the company's flagship paratransit software solution. RouteMatch TS leverages the real-world GIS street network for scheduling and routing with the ability to seamlessly integrate with mobile data communications, automated vehicle location, and voice recognition technology to improve efficiency of today's public transportation services.

Nine transportation systems are new customers and currently implementing RouteMatch TS, including City of Corona in California, Cobb Community Transit in Georgia, Fairbanks North Star Transportation Borough Department in Alaska, Citrus County Transit in Florida, City of Alexandria in Virginia, Denver RTD in Colorado, Franklin County in Pennsylvania, Lake Erie Transit in Minnesota and American Red Cross in Kentucky.

"We are thrilled that our RouteMatch TS product continues to set the bar for routing and scheduling efficiency. This is owed in large part to RSE, our robust, smart scheduling engine that allows providers to automate scheduling and routing in a sophisticated, yet easy-to-use manner. In layman's terms, we help make sure vehicles pick-up and drop-off passengers on-time and in the most efficient way," said Tim Quinn, executive vice president for RouteMatch.

Of the 128 systems currently using RouteMatch TS, some of the largest customers include: South Carolina DOT; Iowa DOT; Intercity Transit in Olympia, WA; City of Corona, CA; Lee County Transit in Fort Meyers, FL; City of Santa Fe, NM; Denver RTD in Denver, CO; and Inter-County Public Transportation in Elizabeth City, NC.

Public and private transit providers look to advanced transportation systems to achieve the following: operate with improved on-time performance, move a greater number of passengers with less vehicles, increase customer satisfaction and improve the bottom-line through cost savings and efficiencies.

About RouteMatch Software

RouteMatch Software is a proven leader in transportation and logistics technology and services, with specific expertise in demand-response and paratransit systems. Targeting private and public sector transportation providers, the company's products address routing, scheduling, dispatching, billing, reporting, fixed route integration, and transportation coordination. Founded in 1999, the company is headquartered in Atlanta, GA, and its software is currently in use at more than 145 sites in 34 states across the U.S. More information about RouteMatch Software products is available at www.routematch.com or by calling RouteMatch Marketing Services toll-free at 888-840-8791 or 404-876-5160.
