

A Total Solution Advanced Transportation Management Software System Redefining Paratransit and Demand-Response Transportation Management.

RouteMatch TS™ is a Total Solution comprised of numerous features and functionalities for the complete management of a paratransit and demand-response passenger transit operation.

TS incorporates a schedule and route optimization engine, RouteMatch Scheduling Engine (RSE) to automatically generate the most efficient and realistic schedules and routes.

TS uses advanced logistics algorithms and combines these with the world's leading Geographic Information Systems (GIS) technology and Microsoft database management software.

TS Fully Automates Your:

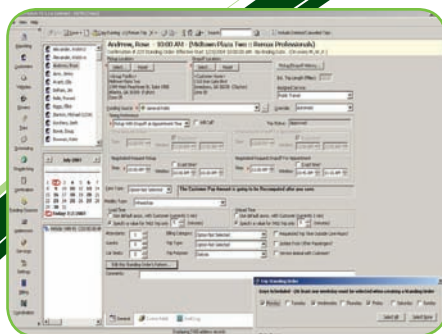

- ✓ Customer Management
- ✓ Integrated GIS Mapping
- ✓ Driver Management
- ✓ Vehicle Management
- ✓ Trip Management
- ✓ Schedule Optimization
- ✓ Dispatching
